SECTION V

THE WINKLER INTERNATIONAL REGISTRY

The Winkler International Registry has been developed to determine where Winkler families have migrated and where they live throughout the world today. Using a highly sophisticated network of computer sources in Europe, North America, and Australasia, over 170 million name and address records have been searched to locate Winkler family members. The sources of these records include electoral rolls, telephone books, city directories, and miscellaneous public surname lists. The result of this research as related to Winkler single and family households is summarized in the following chart.
